

# Release Checklist

v2018-05-11

From [github.com/andrewgreenberg](https://github.com/andrewgreenberg)

## Other Checklists first

- Schematic checklist
- Layout checklist

## Commit

- All files are committed, and the repo is clean.
- Check the correct branch.
- Check any temporary stashes (e.g., git stash)

## Build

- Create build files (using automation as possible).
- Verify build files are valid (e.g., use 'gerbv' to look at Gerbers)

## Check version numbers

- Make sure Schematic, board, BOM, README, and build files all have the correct version number

## Order BOM First

- Order BOM and confirm component availability
- Schematic/layout may have to change because of lack of stock, or part end of life.

## Release

- Create and archive a ZIP file for future reference with date/time in filename.
- Send off build files.
- Confirm with fab house and CM that they are using the current version of the project.
